

BELIEVE YOURSELF = CONVINCE YOURSELF

EVERYTHING IS A REFLECTION

EVERYTHING IS HABIT OF THOUGHT

IT'S ALL YOU

IT'S ALL PERCEPTION

IT'S ALL SUBCONSCIOUS CONVICTIONS

IT'S ALL A DREAM

IT'S ALL ABOUT TRUTH

IT'S ALL ABOUT LOVE

IT'S ALL ABOUT GOD

YOU ARE GOD

DON'T LISTEN TO ANYTHING THAT BRINGS YOU DOWN

DON'T ACCEPT DESTRUCTION. KEEP RISING!

YOU ARE THE CREATOR

SPEAK POSITIVE OVER YOURSELF

GOOD SPIRIT ATTRACTS GOOD THINGS

SIMPLE AS THAT

TRANSMUTATION.SE

CREATION

As a collective of souls we are bound to truth. Despite our approach to it as human beings. Because a soul IS truth. There is no separation. So what does that mean to a third dimensional world such as the earth? It means that we always want a solution. A solution to what? Well.. A problem. So what's the problem?

Distance.

The problem is always about distance. Distance to what? You wanna travel or sum?

Distance from truth. Truth is soul. Soul is Love. Love is God. God is Love.

What that means is we're always looking for a solution as we fail to connect.

- But we got 5G WiFi almost everywhere now!

That's artificial connection in the name of rational & logical technology. That's good if you use it for good. But mainly it's not used at all. It's using us. And because it is we are distancing ourselves from each other. So we believe that having WiFi everywhere at incredible speeds will supply the need upon demand.

But we don't understand our own demand.

Most of us live with just a few decimeters apart. Many of us live within the same walls. Most of us live inside our own body.

But very few of us are connected to soul.

Because we don't believe in it. And that is very easy if you've experienced it. Then there is no denying it. So that's my game.

I would like to remove the distance. Internationally. Globally.

As I'm doing this with myself.

We have been struggling with God for such a long time now. All based in technology.

Yeah..

Even before WiFi.

A book is technology. It's rational and logical structured words in a compendium.

It can work.. If used properly. And if there's only one.

What I have written is free from any conceptual attachment. And it's all about God.

It's all about a true foundation. Energy. Heart connectivity.

It's realigion.

No metaphors. Very clear about how this world is a reflection of what we give. And what we give is what we send out thru our hearts.

I have answered the call of the soul collectives need for a solution to the problem regarding connectivity & thus distance to truth. And I've done so with clear and humane explanations.

This is my creation.

My problem becomes the same.

Distance & connectivity. As I need to believe in my own creation and keep connected to truth, God, Love, Source. Just imagine what impact this would have on humanity as it hits official! To me at least there is no denying what is on this website. It's just in your face straight up truth! Deal with it!

Just like my life. Just like your life. Just like our existence.

God never questioned creation. And neither should we. We should continue to create what is loving and believe for it to succeed. That's a belief in the power of love and that ladies and gentlemen is a belief in God!

Whatever has been created or will be created comes from inspiration which is God. And we use that in our own specific taste and mold that into a unique expression singed our soul. And then we send that out hoping for it to make an impact for the better. If we believe in it and love it then it will make it's way to the masses!

Which means that we gotta believe in it all the entire way.

We gotta believe that we are God. We gotta believe that we have the power at our disposal. Because we do. We should not play it small. We should raise our voice and do something beautiful for the world and humanity.

I cannot rest. And I cannot give up on this.

If I do? I would have to give up on myself.

Because it's all about the simple message. And I am that message. I am the messenger.

Someone has to do it..

Or else we commit genocide.

With perfect functioning and stable 5G WiFi connections left behind.

All expansion of internet connectivity seems to be in relation to a higher definition of media content. As in visual definition.

But the content of love is not there..

We will never create artificial love. CAN YOU GET THAT??

Humanity is suffering and actually dying. Right under the nose of ourselves. Living in disconnection to Love. No connection of joy and happiness inside their hearts. Just a bunch of joy and happiness with the next purchase. Or episode. Or meal. Or paycheck..

The world is moving faster and faster..

But nature will not adjust.

Nature is God. God is Love.

But love is also the most powerful thing in the universe. And just like a rose that has thorns. When you pressure love you'll eventually get hurt.

That wasn't really self-defense as in actively defending oneself.

It was from mistreatment and idiotic behavior in relation to what gives us all.

So the pain and suffering was brought on by ourselves.

Love won't step on anybody's toes. It's just available as we love it so much.

But neglect it and the lights go out. KO. Over.

Praise the 5G and die!

You'll feel it coming though. As you feel empty inside and the addiction has a hold on you. The content you experience is hollow and empty and that simply becomes yourself as you are what you eat. You get what you give.

This world is not creative. It's not loving. It's not natural. It's not connected.

Humanity today is so ungrateful and in such distance to love.

But surviving and feeling good with momentary pleasures.

This website is from God. From Love. Thru me. To try and make everyone realize that we need a mutual foundation and to let go of the past. A new chapter.

To make a global reset in relation to guilt.

Because we are working with so much resistance now. Looking to find a way to escape the problem and live on Mars.

We have created so much guilt. And we still create it..

As we keep disconnected and distanced to God.

What is all the fast pace for? Really? Why?

Where are you going? To become more and more efficient?

Sounds like a robot to me?

What if everyone stopped shopping for a month? Have we ever tried that? Could the people of planet earth really stand that?

What if we gave up social media, alcohol, TV, caffeine & shopping for 1 month?

And just take walks, play boardgames together, paint, write, sing?

- That's so lame!!!

Says someone on edge. Someone having a hard time relaxing. Someone living a life in fast pace. Someone who needs to sooth there nervous system all the time.

Someone who's actually not present.

Someone who could need a detox.

For let's say a month. And just try it out wholeheartedly.

Because you know what? You don't know SHIT without experience. So you cannot say anything about it before you've tried it. And if you manage to focus your mind and being present and enjoying just being you might change your lifestyle after that test month. And maybe you'll get a perspective on what is actually going on?

When you get that perspective you'll see:

Wow! If we continue like this we'll lose all love! And we will die.

Even though we're still walking around. We'll be zombies! Robots!

And all the while we create everything! We set the pace! We build the structured society that have rules and demands of which we follow! If we are working as slaves and lose time with loved ones we are missing out on life? And then we die.

We accept that.

So what do we do?

..Revolution?..

That's usually a bunch of violence.

If we slow down and come to peace within? We will peacefully not accept something that hurts us. We won't work as many hours. We will take care of our well being so that we give most our our energy to the ones we love. Especially to ourselves.

To give most of your energy to a job is a waste of life.

But most agree to this because of a standard that everyone else follows.

Like Lemmings walking straight over the cliff down to the burning lava.

But it's different with passion! When you do what you want to do! That's when you listen to your heart and live a life of heart desire! Then you can work a bit extra even as you feel that it gives you so much!

You wanna know how to do that?

You gotta get rid of resistance and keep connected to God, to Love.

And then you'll make yourself feel good. And make yourself feel great!

And what you do doesn't matter that much! If it's hurting you in the long run physically and mentally? You'll work less hours because you'll take care of yourself.

God is Love. Love is God.

That is your heart! You connection to love.

I know it seems trivial and simple but life is simple. The design of living a good life is right there. Connected to truth and love.

And most importantly a belief in love! A belief and faith in the power of God!

Which is only possible with a positive attitude to life!

And that is way more easy when you ain't got a bunch of resistance!

So it all works out!

All energy! All attachments and affirmations!

All praise and gratitude to the source that gives us all! That we give in connection with our hearts! ..Not 5G WiFi..

Word.
