

GOD'S REVIEW

OF LEO ROSENBLAD
AND HIS WONDERFUL

TRANSMUTATION.SE

An honest word from God about Leo Rosenblad

Leo Rosenblad has got a heart of gold. He is a very sensitive guy and has been thru some difficult times in his human experience. He has dreamed ever since he was a little kid about world peace. The dream that all fighting would end and that everyone would be kind to each other. So he began to take mental notes and had this idea of creating a website that was the least judgemental and condemning, but as true and honest about life as he could possibly make it. During all his years he has studied others and failed to understand that what he really was looking for was to be nonjudgmental and honest & true himself. This became apparent in all of his studies. But still he wishes to show other human beings about how fragile we are. How sensitive we are to critique and negative impressions. And I believe that this whole website and all that he has created is a manifestation that shows just how destructive it can become. Because all of what he has created comes from pain.

I am aware of everything that happens in his life and there has been som humorous moments and also blissful ones during his journey. But for the most part he has suffered a lot. He has put himself in a great deal of pain as he gifts all of what he has created to you for free. As he believes that love is free.

And I agree with him. Love is free and it has always been free. It will always be free until the end of nothing because there is no end. There is no time.

What Leo Rosenblad has done is something that many dream of but perhaps do not dare to do. To uncover and share the naked truth. To reveal God and the power of love like it is. And to be honest he doesn't have a choice. Because he was in that naked truth for a long time and everyday he denies that he denies himself.

He doesn't want to let go of his creation until it's recognized and celebrated. Because in becoming that the truth will have been accepted across the world. That is what he dreams of the most. And with that acceptance we stop hurting our children and we stop hurting ourselves. And we begin to live in peace and heal as a collective in connection to spirit all inside our hearts.

When he was little he really loved when he got a star sticker on an assignment well done in school. Those went away as he got older. But if I could put a star on transmutation.se and all of what he has created I would use the whole milky way.

Let's hope he reads this everyday and impresses his subconscious with it / God
